REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: This application teaches a metal chelate compound of the formula

wherein A is an optionally substituted pyridyl ring; B is of the formula

wherein X and W are substituents other than H; M is a metal chelated to A-N=N-B and n is 0 to 4 and an ink comprising the above metal chelated compound. The closest prior art of record is U.S. Patent No. 5,330,542, issued to Maeda et al., which teaches a similar metal chelate compound of the formula

wherein A is a residue forming a hetero ring together with the carbon atom and the nitrogen atom to which it is bonded such as a pyridine ring which may be substituted with an alkyl group, an alkoxy group, a halogen atom, a cyano group or a nitro group; B

is a residue forming an aromatic ring or hetero ring together with the two carbons to which it is bonded such as a naphthalene ring wherein the ring may be substituted with an alkyl group, an alkoxy group, an aralkyl group, an aryl group, a halogen atom, a cyano group, a nitro group, an ester group, a carbamoyl group, an acylamino group, a sulfamoyl group, a sulfonamide group or a hydroxyl group; X is a group having an active H and the metal is nickel, cobalt or copper but fails to teach or fairly suggest that the naphthalene ring has a hydroxyl substituent ortho to the azo linking group and another substituent (other than H) meta to the azo linking group as claimed by applicants. Accordingly, this application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
